Letter of Support for VisionXAI: Pioneering Visual Analytics for Establishing XAI
Standards in European Finance

Dear dr Olivija Filipovska

The Association for Development of Initiatives Geostrategic Institute Global was formed in 2011. We support and promote science, culture, education and professional development through sustainable and transformative initiatives related to policy issues. Through cooperation with diverse stakeholders we address specific economic and societal aspects for our further actions.

Hereby we acknowledge our commitment to fostering innovative solutions that promote ethical and responsible AI practices within the financial sector and the society. We firmly believe the VisionXAI project aligns with this commitment. We strongly support VisionXAI: Pioneering Visual Analytics for Establishing XAI Standards and urge the CIG committee to view this project favourably and grant it the necessary support to move forward.

Sincerely,

Geostrategic Institute Global

Prof. Dr. Ivan Anastasovski
